

EVOLUTION

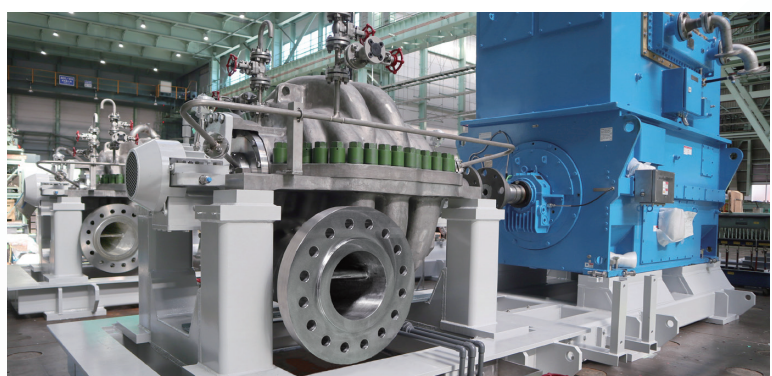

We Invite You to Evolve With Us

In our daily lives, when you turn on a faucet, water comes out, and when you push a switch, electricity turns on. Behind the scenes, pumps are the beating heart of society and industry, working day in and day out without rest. Torishima, a small company founded in Osaka in 1919, has grown to become a part of the foundation of society, and one of the world's top pump manufacturers. Our work directly contributes to keeping the world working.

A pump manufacturer with 100+ years of history

擁有百年歷史的泵浦製造商
